EXPERIENCE

Lead Product Manager – AI Tools

Jan 2024 – Present

Kameleoon

Owning product strategy for Kameleoon's AI ecosystem, including MCP server and tooling, integrations with our Prompt-based Experimentation and AI-assisted workflows

- ◆ Owner of a 12 month product roadmap for AI-augmented development workflows at scale
- ◆ Built and shipped our public MCP server for all major LLMs (Claude, Codex, Gemini, Cursor)
- ◆ Launched persistent organization-wide context for our experiment building AI
- ◆ Shipped AI-assisted add-ons for in-chat asset creation, experimentation automation and feature flagging ops
- ◆ Internally responsible for researching, benchmarking, purchasing and installing all new AI-related tooling internally for the Product team

Senior Product Manager – Feature Experimentation

Jan 2022 – Jan 2026

Kameleoon

Product lead for Kameleoon's Feature Flagging and Experimentation offering and subject matter expert for feature management. Highlights:

- ◆ Built our new offering completely from scratch: conceived, developed and launched a market competitive product in less than 18 months
- ◆ Worked on introducing new AI capabilities within the product including an AI co-pilot
- ◆ Grew sales conversion and product traction to account for 10% of all campaigns launched with Kameleoon
- ◆ Rapidly matured the product for enterprise readiness and was listed as a key market player in the space by Forrester and Gartner in their market intelligence reports

Senior Product Manager – Growth

May 2021 – Oct 2021

KeepTruckin

Part of the smallest yet most impactful team at KeepTruckin. I own all aspects of our products' retention and engagement, primarily looked at:

- ◆ Customer support experience: implemented an enterprise level chatbot (Ada.cx) and livechat to achieve 30% support volume containment
- ◆ Churn: driving our churn data analysis to define leading indicators of low customer health and achieve 17% save rate
- ◆ In-app help and messaging: revamped our Help Center for better content discovery and self-help.
- ◆ Also improving our user engagement via in-app messaging for better guided walkthroughs, feedback loops, upsell campaigns and product support.

Co-Founder & CEO

October 2017 – January 2022

Soop.io

Soop.io is a comprehensive, end-to-end cloud-based School Management System, designed to be flexible to seamlessly integrate with any school's existing database schema, hierarchy, class structure, etc. as a PaaS that offers various modular services.

- ◆ Incubated in accelerator program at NIC Lahore
- ◆ Total onboarded users: 30,000+ at time of acquisition and exit

Product Development and Marketing

August 2012 – December 2021

UpWork

Freelance consultant and product owner for international clientele. I recruit and manage an adhoc team of designers and developers to deliver on requirements for mobile and web applications, as well as digital content and marketing support.

Product Lead

July 2019 – January 2021

Qwanse

Product lead for development and management of a comprehensive digital platform for logistics businesses to automate almost all paperwork, processes, reporting, contracting and communication in multi-modal transport, as well as digital freight forwarding.

- ◆ Setup diverse customer acquisition channels through TV, print and conventions
- ◆ Established partnerships with 3PL players such as Carrefour for higher initial traction, including a specialized referral subscription program for faster market penetration
- ◆ Setup and ran LinkedIn Campaign Manager for targeted campaigns to B2B trucking companies reduce CAC for cross-border customers
- ◆ Write, design and routinely post new social media content for better customer engagement on LinkedIn

Senior Business Analyst – Products & Platforms

July 2016 – September 2018

Inbox Business Technologies

Product lead for mass scale digitization projects in the public sector. Responsible for complete planning and execution of B2G/B2B presales, solution design and tendering. Concurrently engaged in multiple projects' solution research and design, product/business analysis, project/stakeholder management, budgeting/costing, contract management and content creation. Highlights:

- ◆ Project lead and technical account manager for CAPP – a province-wide government initiative for the digital and financial inclusion of farmers. Led end-to-end business planning, strategy, products' development and execution of the entire digital platform and services (infrastructure, call center, field ops, staff training program, sales/distribution). (Budget: \$7.0 million, Monthly Active Users: 75,000+)
- ◆ Solution design and POC for the Federal Government for tax analytics and fraud detection using OpenText™ Big Data Analytics Suite.
- ◆ Proprietary enterprise product for management of fleet of 2000+ vehicles. (Daily Active Users: 1,200+)
- ◆ Enterprise-grade cyber-physical maintenance systems in food and pharmaceutical manufacturing (Active Users: 10+ manufactories)
